The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kashiwa et al. (US Patent 5,773,049).

Kashiwa et al. disclose a fixed platen 2, a movable platen 4 and a rotatable turret 3 positioned between the platens 2 and 4. Each of the platens each having a female mold half matable with a male mold half 16,17 located on the turret. The turret having actuators 22 for moving the turret in the direction of the movable mold where the actuators move the turret independent or not independent of the movement of the movable mold. See Figs. 3-12.

Applicant's election with traverse of claims 1-4 in the reply filed on 10-31-05 is acknowledged. The traversal is on the ground(s) that the search would be the same. This is not found persuasive because the apparatus does not require the pressure to be maintained throughout the process.

The requirement is still deemed proper and is therefore made FINAL.
